Axor One Thermostatic Module- 2 Outlets

AXOR One was created by London designers Edward Barber & Jay Osgerby. They focus on the philosophy of interaction design: here, the design is determined by how the user interacts with the product, making AXOR One a truly intuitive shower control system.

The convenient Axor One control unit comes in three different thermostat variants, for controlling up to three showers. They all use Select technology, enabling intuitive operation. The range of products also includes a shut-off valve for using another shower, as well as a porter unit and shower support.

Features: Simultaneous use of 2 outlets

Installation: Inwall body is provided and must be fitted during rough-in

Finish: Available in all Axor finishes
