

Camouflage Hook

Camouflage is for people brave enough to stand out from the crowd. This award winning busk+hertzog design helps you show your true colours. Camouflage has a three-dimensional effect, because each Camouflage shape can be mounted at three different distances from the wall. This means it's up to you to choose the combination of shapes, where they are placed, and their height from the chosen surface.

Reddot design award winner 2010, Good Design.
