Sesamo Recessed Toilet Roll Holder

Disappear and appear only when necessary. Integrated into the wall to contain a space. It redefines the archetype of the accessories in the bathroom, radically changing the perception and imagining these elements as part of a wider integrated project. The collection of accessories Sesamo takes shape from the desire to eliminate everything that is aesthetically superfluous to enhance the functionality of these elements.

Each element is formed by a body to be mounted in the wall and completely covered by a front with the same material, finish and colour of the wall itself.

Material: Stainless steel.

Finish: Aluminum.

Installation: Inwall component must be installed at rough-in.
