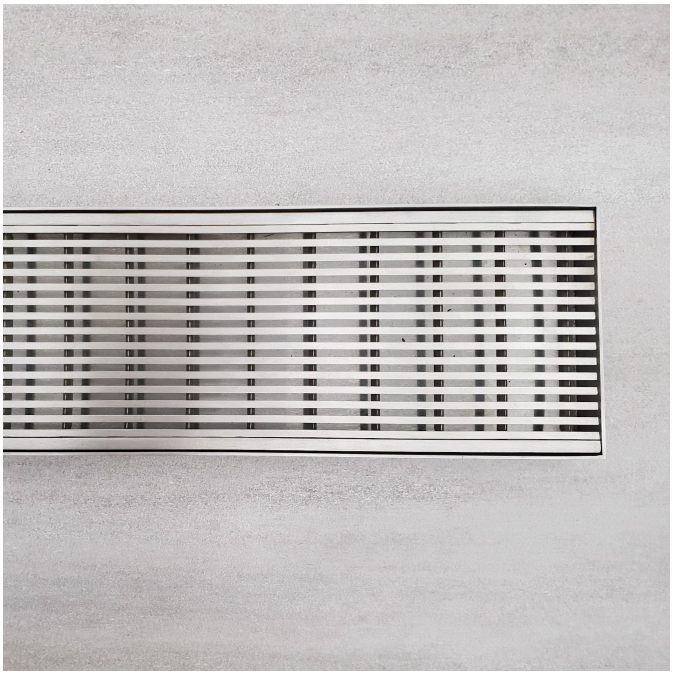
Heel Guard Grate



The Heel Guard style of grating by Bespoke Bathware is very robust and can be used in very harsh condition such as public amenities or driveways where you would require large volumes of water to be disbursed. It is also very stylish and has been used in the most prestigious and upmarket houses. With an overall depth of 22mm or 32mm, this style of grate fits within the screed depth.

Finish: 316 Stainless Steel

Options: Available in various standard lengths ranging from 600-3000mm. Longer lengths also required on request.
