

Ramp Integrated Basin

Ramp is a sloping concrete sink. We make these stunning basins regularly for bars, cafes and shopping centres, but they also look great in residential bathrooms.

The water drains to a slot at the rear of the ramp, from there it falls to a central waste point that connects to a regular threaded plumbing fitting. You have the option of tap hole(s) if required or pair with wall-mounted taps for a truly sleek look.

We have a number of options for customised wall supports for the Ramp design, including into alcoves up to 3600mm in length. Alternatively the Ramp can be mounted onto cabinets or floor standing frames.

Lengths: 750mm to 3600mm

Options: Floating or cabinet mounted, With or without tap holes

Weight: Varies according to length; please enquire

Material: Meticulously crafted silica-free concrete

Fabrication time: 6 - 8 weeks
