

Milady Rimless Back-To-Wall

Collection Milady is the new criterion in rimless toilets, a marriage of timeless style and flawless functionality. The latest edition to a refined range of toilet suites for the contemporary Australian bathroom, Milady is available as a back to wall suite, wall hung and wall faced toilet variations.

Milady Rimless toilets are a more hygienic choice, and although we've removed the rim, the bowl houses a high channel edge which eliminates splashing. Featuring a full 360 rapid flush waterway, Milady utilises smaller jets that create greater pressure, meaning you won't have to flush twice. This powerful water delivery system has been rigorously tested and refined, producing an effective yet water efficient flush (4 Stars WELS Rated).

The soft closing seat features easy one touch release which makes cleaning a breeze. Second to this, the entire Milady collection features our Cleanmax nanotech anti-bacterial surface glaze technology, which prevents surface dirt accumulation and bacteria breeding.
